Catskill Environmental Research and Monitoring (CERM) Research Directory

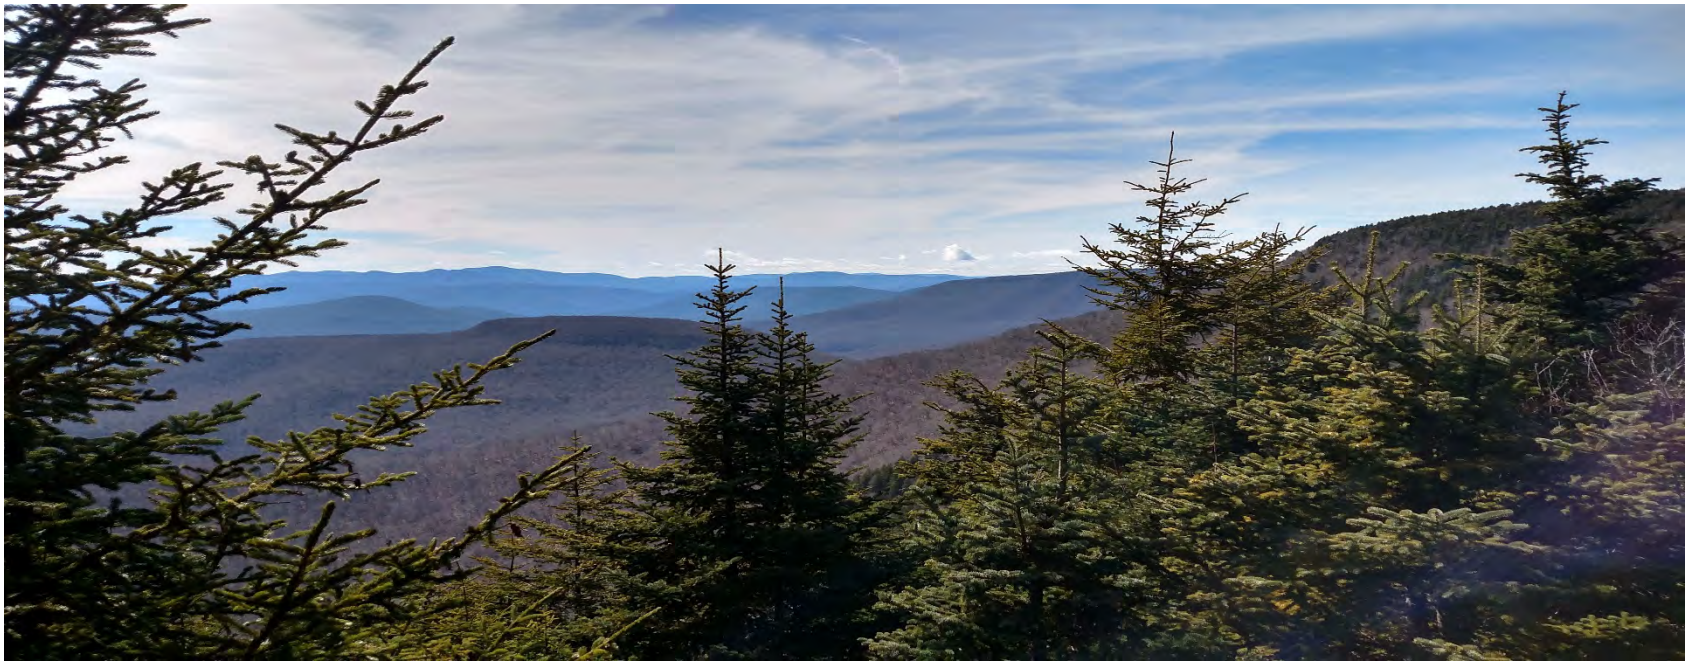
CERM Biennial Conference

October 27th and 28th, 2016

Don Kent, Scientist Water Ecologist
New York City Department of Environmental Protection
Kingston, NY

What is the Research Directory?

- A listing of the research projects conducted in the Catskill Region.



- The purpose of which is to promote scientific networking and collaboration among scientists working in the Catskill Region.

How will the Research Directory be built?

- The Research Directory is populated with the responses participants enter into the Project Entry Form.

  - What is the Project Entry Form?

- The Project Entry Form is a simple Google Form that takes participant responses and automatically generates a “results or project spreadsheet”.
- Acknowledging that most of our work is multidisciplinary in nature the questions are designed to be broad enough to capture all of the possible activities yet specific enough to allow the project spreadsheet to be easily searched and sorted.
- In order to encourage participation the entry form is quick and easy to fill out.

Let’s take a Look!

Research Directory Project Entry Form

Catskill Environmental Research and Monitoring (CERM) Research Directory

* Required

Project Entry Form

The information that you provide here will be used to develop a research directory that will aid in CERM's mission of scientific networking and collaboration.

Project Details

Project Title *

Project Objective
Please provide a brief summary

Watershed *
Select the one that best applies

- Ashokan
- Cannonsville
- Neversink
- Pepacton
- Rondout
- Schoharie

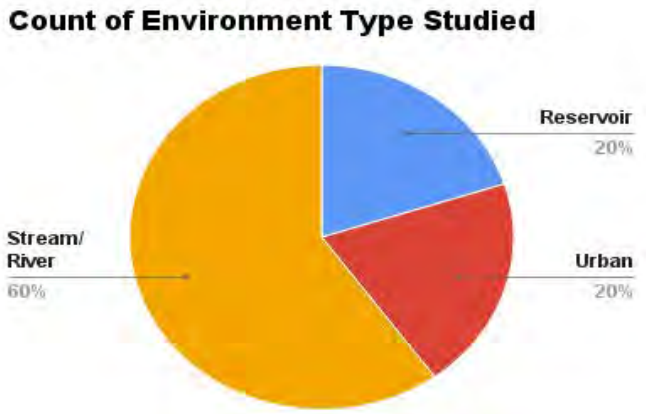
Some sample Entry Form questions

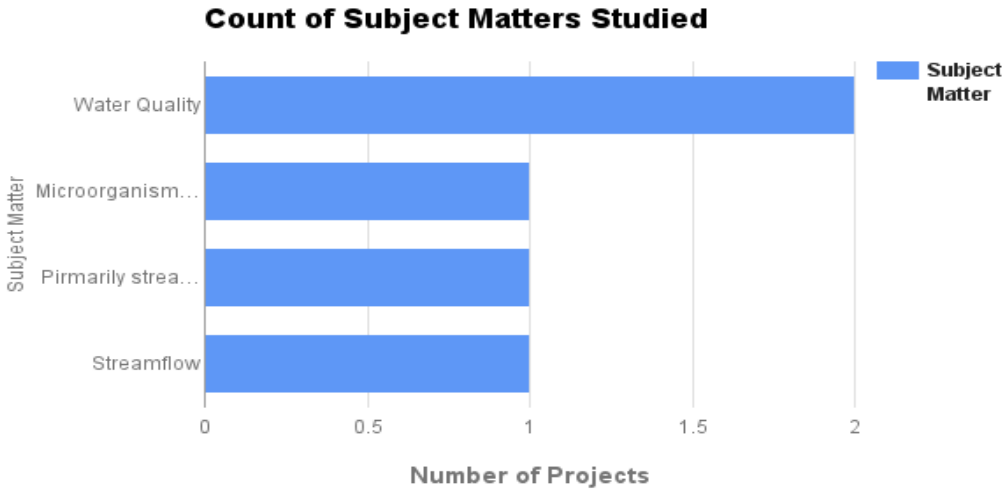
The Entry Form questions are organized like a scientific triage which will facilitate sorting and searching of projects.

- Watershed (Ashokan, Cannonsville etc.)
- Environment (Farm, Forest, Reservoir, Lake, Stream, Wetland etc.)
- Subject Matter (Air Quality, Fish, Insects, Plants, Water Quality etc.)
- Scientific Discipline(s)
- Data Collected
- Period of Record
- Publications
- Contact Information

Research Summary Statistics

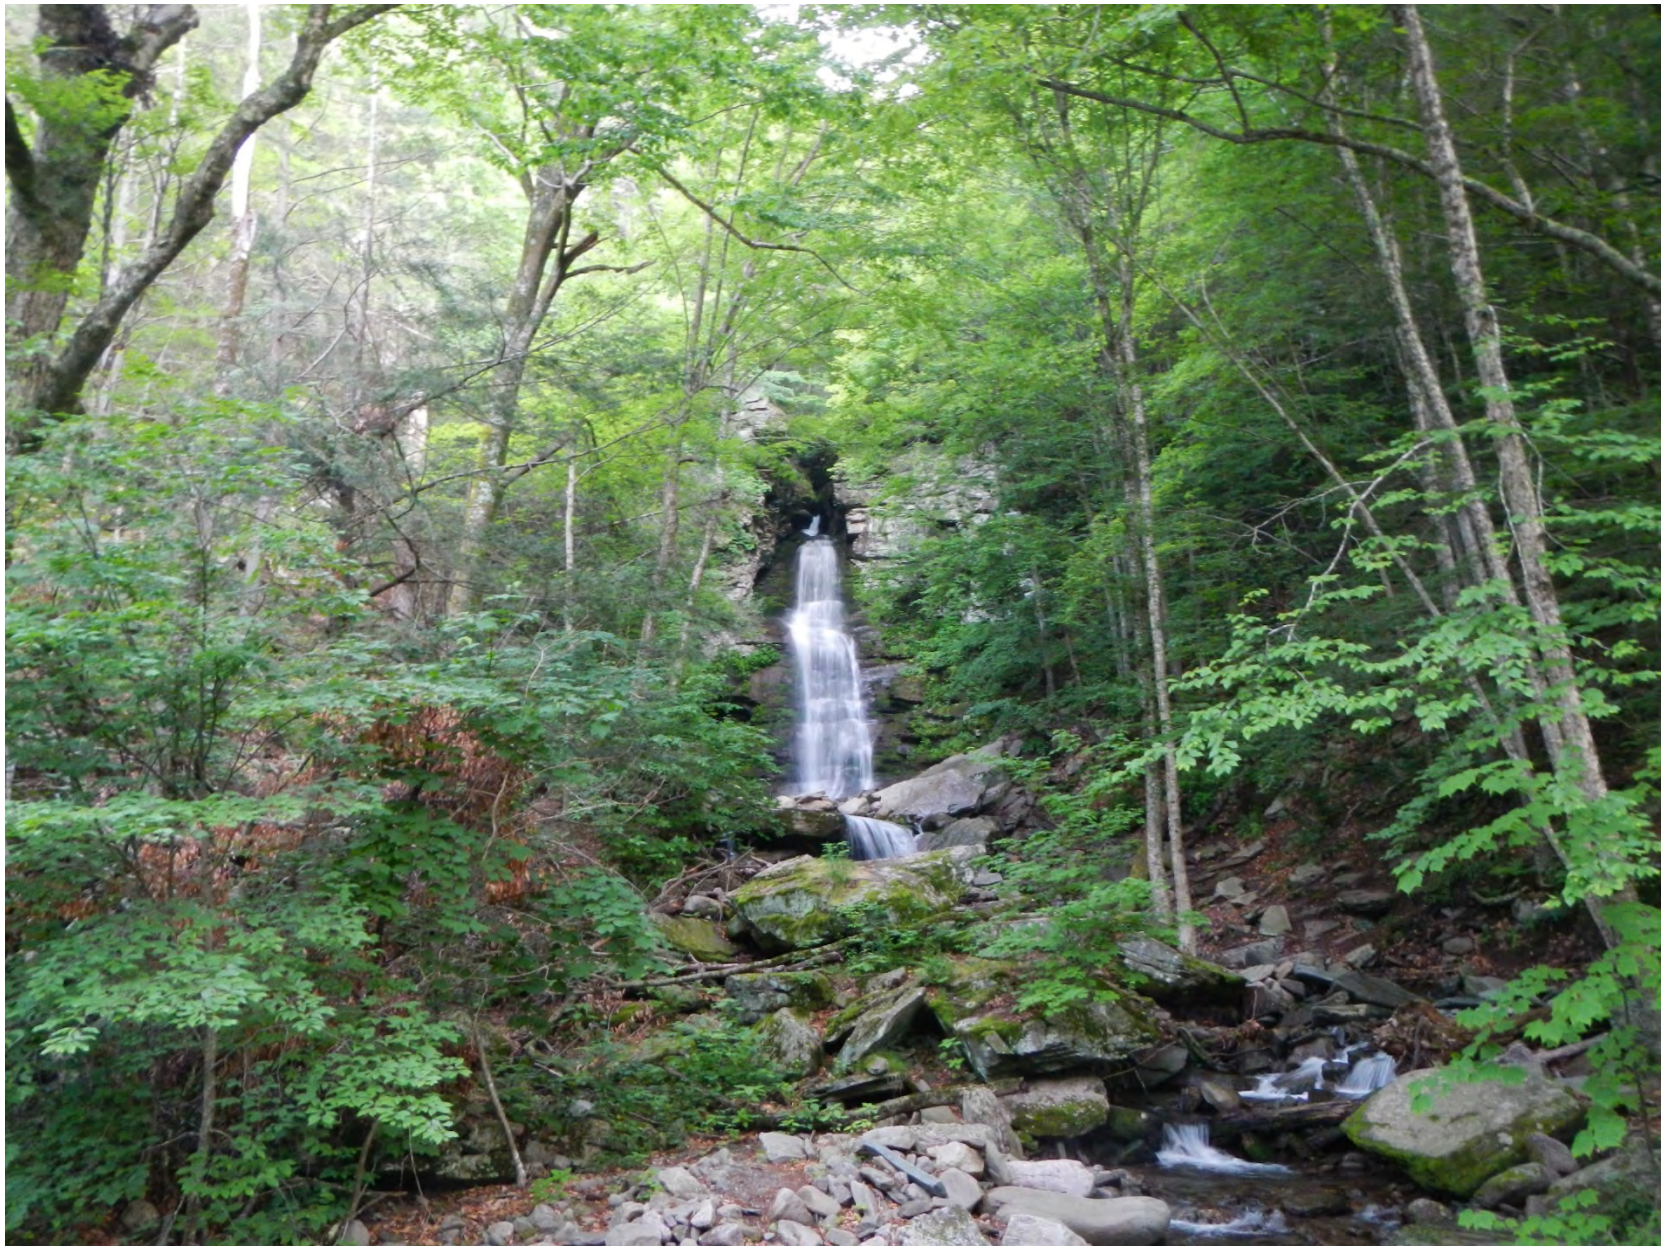
- Charts and graphs can be used to summarize the types of research being conducted in the Catskill Region.





What's Next?

- The Research Directory project spreadsheet will be shared via the Ashokan Streams website at: http://ashokanstreams.org
- Researchers will be able to sort and search the Directory in order to find others doing similar work.
- The longer term plan is to use the results to develop a CERM Research Guidebook consisting of one page summaries of each project.
- This is a "living document" that can be edited and amended any time.
- The greater the participation the better the end product.

Please visit our table and take a moment to complete the form!


Thank You!
